

For Pepperdine students, I will collect your homework via Courses/Sakai assignments and will be returning the graded on paper or in the Drop Box feature.

1. For each file you wish to hand in (`.rkt`, `.pl`, `.java` or `.cpp`), first duplicate it on your local machine.
2. Change the name of the duplicate file by prepending your two-digit assigned number to the original name. For Assignment 1, you are handing in the file `a01.rkt`. So, if your two-digit assigned number were 99, you would duplicate the file and change the name of the duplicated file to `99a01.rkt`.
3. Login to CoSc 450.01 on Courses/Sakai. Hand in the duplicated file with the modified names as an attachment in Assignment 1.
