

For Pepperdine students, I will collect your homework via Courses/Sakai assignments and will be returning the graded pdf in the Drop Box feature.

1. For each file you wish to hand in (.cpp, .pepo, .pep, or .jar), first duplicate it on your local machine.
2. Change the name of the duplicate file by prepending your two-digit assigned number to the original name. For Assignment 1, you are handing in one file. So, if your two-digit assigned number were 99, you would duplicate the file and change the name of the duplicated file as follows:

99Prob0215.cpp

3. Login to CoSc 330.01 on Courses/Sakai. Hand in this duplicated file with the modified name as an attachment in Assignment 1.
